Can you risk not upgrading?

Did you know that the Windows Server 2008 is no longer supported? If you have an outdated server your business runs the risk of being completely unsupported and unprotected leaving the following at risk:

DATA

Lack of security updates mean new vulnerabilities will not be fixed.

DATA COMPLIANCE

Typically, data compliance requires businesses to take appropriate steps to prevent data breaches.

UPGRADE TODAY

Solutions for you

Lenovo can provide your business cutting edge IT through customised solutions. Lenovo offers an open server, storage, networking and system management portfolio that seamlessly integrates with your environment to:

Reduce Costs

Empower & Protect

Focus on growth

Uptime and reliability are critical to efficient data centers and successful companies. Unplanned downtime can cost businesses up to \$300K per hour. It's why our #1 goal is to be #1 in reliability. Lenovo servers achieved the highest levels of "five nines" or 99.999% reliability among all mainstream server hardware platforms.
